

AYUSH KASHYAP

AI Engineer | GenAI Developer | Agentic AI Systems

Jaipur, Rajasthan | +91 9693932656 | ayush.kashyap7155@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Science (AI & Data Science) student with hands-on experience building Generative AI and LLM-powered applications, including Retrieval-Augmented Generation (RAG) systems backed by vector databases, prompt engineering, model fine-tuning, and multi-agent / tool-calling workflows with LangChain. AWS cloud experience and software engineering internship background in AI-driven automation. Google Gemini Student Ambassador with experience leading technical teams and driving university developer initiatives.

CORE SKILLS

Generative AI & LLMs: Large Language Models (LLMs), RAG, Prompt Engineering, Fine-Tuning, Multi-Agent Systems, Tool-Calling, MCP, LangChain, LangGraph

Machine Learning & Data: Machine Learning, Deep Learning, NLP, Data Analysis, Data Visualization, Statistical Analysis

Cloud & Infrastructure: AWS Cloud Services, Vector Databases, Docker, Git & GitHub, System Design

Languages & Tools: Python, SQL, JavaScript, CLI Development, Tableau, Excel, Supabase

WORK EXPERIENCE

Voxzen AI — Software Engineering Intern

Feb 2026 – Apr 2026 | Jaipur, RJ

- Contributed to development of AI-powered creator automation solutions focused on voice dubbing and content management.
- Collaborated with product and engineering stakeholders on testing, deployment, and workflow automation.
- Supported Generative AI integration initiatives and improved user experience through feature implementation and system optimization.

PROJECTS

AI Research Intelligence & Knowledge Retrieval System (RAG Platform)

2026

- Built a Retrieval-Augmented Generation (RAG) platform (github.com/Ayush0135/research-agent) using LangChain, NLP, and a vector database to convert research papers into actionable insights.
- Applied prompt engineering to improve retrieval-augmented response quality and support faster research and decision-making.

Forge CLI — Developer Productivity & Workflow Tool

2026

- Designed and developed an open-source Command Line Interface (CLI) tool (github.com/Ayush0135/forge-cli) to streamline project initialization and automated workflow scaffolding.
- Implemented modular command parsing, configurable execution routines, and robust error handling to enhance developer experience and workflow efficiency.

LEADERSHIP & COMMUNITY

Google Gemini Student Ambassador (GID: 4535) — Student Ambassador, India

2026

- Selected to promote AI awareness and Generative AI adoption through workshops, technical discussions, and peer-learning initiatives.

PANACHE Annual Festival — Technical Team Lead, VGU

2025

- Led technical operations and volunteer coordination for the university's flagship annual festival, managing infrastructure across multiple stakeholder teams.

Hackathon & Gameathon — Event Convener, VGU

2025

- Organized and managed a university-wide hackathon with 300+ participating teams, overseeing planning, logistics, technical support, and operational execution.

EDUCATION

Vivekananda Global University — B.Tech in Computer Science (AI & Data Science)

Expected Jun 2027 | Jaipur, RJ

Relevant Coursework: Data Structures & Algorithms, Machine Learning, Artificial Intelligence, System Design, DBMS, Data Visualization

CERTIFICATIONS

- Training Neural Networks** — LinkedIn Learning
- Google Data Science Professional Certificate** — Coursera
- Generative AI Professional Certificate** — LinkedIn Learning
- Database Management System (DBMS) Certification** — Great Learning
